

Coolant Exchanger

Features:

- Cuts the time needed for a typical drain and fill by at least 50% — a typical job takes 15 – 20 minutes.
- Vacuum fill process makes it fast and easy to add coolant to an empty system after repairs are made.
- Pressure tests make it easy to determine if a leak exists.
- Powered by standard shop air and the vehicle's 12V battery.
- One hook-up checks for system leaks, verifies cap operation and checks the function of the overflow tank.

Specifications:

- Dimensions: 48" h x 25" w x 26" d (121.9 cm x 61.6 cm x 66 cm)
- Weight: 125 lbs. (56.7 kg)
- Power Source: 12V DC and compressed air, 75 psi min. @ 5 cfm

AIRLIFT™

The End to Cooling System Airlocks

"A tool that every mechanic should have in their toolbox."

This compact, air-operated coolant refiller removes the air from the cooling system and prepares it for quick refilling. When under vacuum, the system is checked for leaks. Any loss of vacuum indicates a leak from the system. Once tested, the vacuum is used to draw the coolant into the system, ensuring there are no airlocks during refills.

Features:

- Quick coolant refilling without any airlocks.
- No need to run the engine to "burp it."
- Makes coolant refilling fast, easy and reliable.
- Checks the cooling system for leaks.
- No more costly customer comebacks due to overheating.

Dex-Flush Coolant Exchanger

Features:

- Back-flush feature.
- Vacuum fill function.
- Cooling system pressure and vacuum testing.
- FREE customer retention program.
- On-site training and service.
- Includes adapter kit and operation manual.

Specifications:

- Height: 39.5"
- Width: 21.5"
- Depth: 19.5"
- Weight: 35 lbs.

Wynn's® TranServe® II+ Automatic Transmission Flush and Fill Machine

Features:

- Performs a complete transmission flush service in under 10 minutes, even on low-flow vehicles.
- Automatic safety loop prevents transmission damage.
- Compact size; uses minimal floor space in service facilities.
- Lighted flow meter so you can see fluid color change during process.
- Totally portable; operates off of the vehicle's battery.
- FREE customer retention program.
- On-site training and service.
- Includes R.E.T., adapter kit and operation manual.

Specifications:

- Height: 40-1/4"
- Width: 21-1/2"
- Depth: 18-1/2"
- Weight: 65 lbs.
- New AFT Capacity: 11-1/2 gal. max.
